1.0 Introduction

1.1 Purpose

This report (“Report”) provides a Assessment Methodology (“Methodology”) for the Upper Captiva Fire District Board of Commissioners (“BOC”) to assess property owners within the District according to their benefit received from the additional operations cost (“Operational Plan”) that expands the fire department personnel by two firefighters – both with EMT-P Coverage and one with ALS Certified EMT-P status. The coverage is for 24 hours/7 days a week/365 days a year. The costs also include all expenses related to the Operational Plan. The Methodology described herein has two goals: (1) determine the special benefits that flow to the properties in the Operational Plan as a logical connection from the Operational Plan, including enhanced use and increased enjoyment and safety of the property; and (2) apportion the special benefits on a basis that is fair and reasonable.

The BOC plans to fund the Operational Plan with proceeds from special assessments that will be levied on the benefitting properties. The non-ad valorem special assessments are intended to satisfy the case law requirements for validity which will permit such assessments to be collected under the Uniform Assessment Collection Act and constitute a lien against the properties within the boundaries of the Upper Captiva Fire District (“District”). Such lien will be equal in rank and dignity with the liens of all state, county, district or municipal taxes and other non-ad valorem assessments. The Methodology described herein is intended to set forth a framework to apportion the special benefits from the Operational Plan financed with the proceeds secured by non-ad valorem special assessments (the “Assessments”) imposed and levied on the properties. The report is designed to conform to the requirements of the Florida Constitution and Chapters 191 and 197, Florida Statutes with respect to non-ad valorem assessments and is consistent with the case law on this subject.

1.2 Background

The District is looking to increase the District’s Operational Plan and to assess the properties within the District according to each parcel’s benefit received. According to an ISO Public Protection Classification Summary Report, the District’s PPC will be downgraded from a 7 to a 10 but could be upgraded to a 4 if the District can increase its manpower requirement by the Operational Plan described in Section 2.0.

The BOC enlisted the assistance of Fishkind & Associates, Inc (“Consultant”) to review the potential for assessing the properties within the District according to the benefit each parcel will receive and make a methodology recommendation and identify any other potential alternative methodologies that may be used in determining each assessment.

A key feature of the Operational Plan is that the total Operational Plan will be borne by the residents whose properties directly benefit from the project.

1.3 Special Benefits and General Benefits

Capital improvement projects undertaken by the District create both “general” benefits and “special” benefits which are readily distinguishable. The general benefits to the public at large, including those property owners outside the District, are incidental in nature to the benefits derived from property within the District which is dependent upon the Operational Plan to provide wild fire safety and prevention within the District.

Special benefits flow as a logical connection to the property within the boundary of the District from the Operational Plan. The special benefits are particular to the actual lots that receive benefit within the District. The special benefits accruing to properties within the District that justify imposing the assessment include enhanced enjoyment and increased use of such properties, which results in such positive consequences as increased value and marketability from better wild fire protection and having staff living on site, and, therefore, the property would have a market value benefit over non-protected types of properties, and decreased home insurance premiums since the Operational Plan would significantly reduce the chance of wild fire damage, improve response times and promote the health, welfare and convenience of the assessed parcels of property.

These differences alone clearly distinguish the special benefits which District properties receive compared to those properties lying outside of the District’s boundaries and establishes that wild fire protection and overall fire protection undertaken under the Operational Plan have a nexus to the value and the use and enjoyment of the lands within the particular District.

1.4 Requirements of a Valid Assessment

Valid special assessments under Florida law have two requirements. First, the properties assessed must receive a special benefit as a logical connection from the systems and services provided. The courts recognize various special benefits, such as enhanced enjoyment and increased use of the property, which in turn may result in increased value and marketability. Second, the assessments must be fairly and reasonably apportioned in relation to the special benefits received by the various properties being assessed.

If these two requirements are legislatively determined by the BOC in a manner that is informed and non-arbitrary, the special assessments may be levied, imposed and collected on the property. Florida courts have found that it is not necessary to calculate benefit with mathematical precision at the time of imposition and levy so long as the levying and imposition process is not arbitrary, capricious, or unfair.

Section 191.009 (b)1 in Chapter 191 of the Florida Statutes states:

“The non-ad valorem assessments in paragraph (a) may be used to fund emergency medical services and emergency transport services. However, if a district levies a non-ad valorem assessment for emergency medical services or emergency transport services, the district shall cease collecting ad valorem taxes under subsection (1) **for that particular service.**” (Emphasis added).

This assessment is not a part of the current ad valorem taxes collected for fire service within the District.

Section 191.001 in Chapter 191 of the Florida Statutes notes:

“Procedures for the levy and collection of non-ad valorem assessments.—(1) A district may provide for the levy of non-ad valorem assessments under this act on the lands within the district for the exercise of the powers authorized by this act, or any part thereof, for all or any part of the cost thereof. The district may use any assessment apportionment methodology that meets fair apportionment standards.”

1.5 Application of the Master Methodology

This Methodology is intended to serve as the factual predicate to evidence the existence of special benefits and how the assessment is to be fairly apportioned. Once that is established, if the assessment is levied and collected on the tax roll under the Uniform Method, its lien status is equal to property taxes and other assessments on the various properties located within a particular District.

First the BOC identifies the Operational Plan then determines the total costs for the project including issuance costs. Finally, the Consultant allocates those costs and debt per parcel for the Operational Plan. Then a dollar amount of a proposed assessment is identified using mathematical formula(s) that are defined in the following sections of this Methodology.

The benefits are apportioned so that no dollar amount as assessed exceeds any determination of special benefit to the property and that the amount levied on different property owners is fair and reasonable.

These steps are further described in the following sections of this Report.

2.0 Operational Plan

The District plans to hire two firefighters – both with EMT-P Coverage and one with ALS Certified EMT-P status. The coverage is for 24 hours/7 days a week/365 days a year. The costs also include all expenses related to the additional staff.

This Operational Plan is in accordance with the District’s Organizational & Mission Statement, its Special District Public Facilities Report and the ISO Public Protection Classification Summary Report.

The Operational Plan is as follows:

2014 UCFRD SPECIAL ASSESSMENT

First Additional Firefighter / EMT-P Coverage (24/7/365)	\$ 182,420
Second Additional Firefighter / EMT-P ¹ Coverage (24/7/365)	202,140
Water Taxi - Two additional firefighters (24/7/365)	21,900
Parking – Two additional firefighters (365 days)	5,840
Off Site Housing for Staff ²	14,400
Additional Equipment / Vehicle Maintenance ³	10,000
Cost of Mail Ballot Referendum	6,700
Cost of Collecting First Year Assessment ⁴	<u>4,000</u>
TOTAL	\$ 447,400

- Notes:
- (1) ALS Certified EMT-P
 - (2) Existing station space required for four part time firefighters
 - (3) Additional cost associated with additional firefighters
 - (4) Estimated if Fishkind & Associates, Inc. collects the first year of assessments if the Lee County Tax Collector's time line of sending out TRIM notices is not met. The Lee County Tax Collector would charge \$1.37 per parcel for a total of approximately \$975.

3.0 Assessment Determination

3.1 Special Benefits to the Property

The Methodology determines how each parcel within a District receives special benefits from the Operational Plan. The specific special benefits within a District shall be determined relative to each parcel of land and identified for the Operational Plan.

There may be certain portions of property such as public and private utility sites, general common areas, government-owned property and properties of tax exempt entities within the District that will receive special benefits in varying degrees from the Operational Plan. However, the precise nature and extent of those potential properties is unknown at this time. The Consultant will review the parcel information and determine which parcels within the District will be receiving benefit and receiving an assessment.

3.2 Reasonable and Fair Apportionment of the Assessments

The assessments will be determined and apportioned to the benefitting parcels in relation to the special benefits received by such parcels as outlined in this Report.

The non-ad valorem special assessments will be fairly and reasonably apportioned by applying the apportionment methodology described in this Report. This is because the special benefits to the property flowing from the Project and the concomitant responsibility for the payment of the resultant and allocated debt have been apportioned to the property according to the reasonable estimates of the special benefits. These benefits include enhanced enjoyment and increased use, which may result in such positive consequences as increased value and marketability, decreased home insurance premiums and promoting the health, welfare and safety of the assessed parcels as previously set forth above.

Accordingly, no parcel within the District will be assessed for the payment of any non-ad valorem special assessment pursuant to this Methodology in an amount greater than the determined special benefit to that property.

4.0 Operational Plan Assessment Methodology

4.1 The Assessment Process.

As noted above, the assessment methodology is a process by which the District will allocate the costs associated with the Operational Plan to properties within the District that benefit from the Operational Plan. The allocation is based upon the benefits that each property receives.

The District will impose assessments on parcels of land within the District boundaries. The numerical analysis provided below is illustrative of the Methodology. Since actual costs may vary from the estimates, the actual figures may change as additional information becomes available. The information provided is the best available at this time.

4.2 The Determination of Properties Receiving Special Benefit

All property within the District that receives a special benefit from the District's Operational Plan will be assessed its proportionate share of the cost of funding the Operational Plan.

The list of property types that could potentially receive benefit are shown in Table 1 on the next page. These property types were determined by field studies, reliance of aerial maps from Lee County and a thorough review of the parcels involved in the District.

Table 1. List of Property Types Potentially Receiving Benefit

Vacant Residential
Single Family Residential
Mobile Home
Multi-Family, less than 10 units
Vacant Commercial
Convenience Store
Office Building, one story
Marina
Restaurants
Tourist Attraction
Cultural Facilities

4.3 The Method of Apportionment of the Assessment

As noted above, as long as two basic principles are adhered to, Florida law allows the BOC great latitude in determining the appropriate methodology to allocate the costs of its Operational Plan to benefiting properties in the District. The two principles are: (1) the properties being assessed must receive a special benefit from the Operational Plan and (2) the assessments allocated to each property must be fairly and reasonably apportioned among the benefiting properties. In allocating the amount of special assessments to benefiting property, Florida governments have used a variety of methods including, but not limited to, property footage, parcel area, trip rates (when the benefit is motor vehicle related like roads), equivalent residential units, dwelling units, acreage, and value. Those methods directly relating to the Project were identified and include:

- Size of parcel; and
- Vacant parcel versus built upon parcel.

Special benefit was discussed in detail in Section 1.3. Therefore, the focus in the remainder of this section is on fair and reasonable apportionment of the District's plans to fund its additional manpower Operational Plan. All of the benefits from the District's Operational Plan are equitably allocated to benefiting properties based on the size of the property and whether the property has a dwelling unit situated on it.

The determination of benefit received to the parcels of land located within District begins with consideration of the benefit received by a typical parcel of land from the District's Operational Plan. In assigning potential assessment values to the parcel types within the District, some factors were considered. First, equal assessments were not considered by the Consultant as they would not pass the fair and equitable test so that method was eliminated. Second, the size of the parcel was considered by the Consultant and determined to be one of the fair and equitable ways to levy assessments since all of them would receive some benefit from having additional firefighters on staff. The benefit of having staff ready and available is again predicated on the size of the parcel as larger parcels would need more firefighters to attend to any blaze such as a wildfire that arises. In addition all parcels would be more marketable if they are insurable due to the higher fire rating.

The Consultant also determined that parcels with structures on them would receive an additional benefit due to the fact that those dwelling units would have habitants from time to time if not full time and therefore would receive additional benefit of having Firefighters with Emergency Medical Training on staff and would also benefit from the lower fire rating with reduced fire insurance premiums.

To determine the mathematical formula to calculate the assessment for each parcel within the District, the Consultant first took all of the parcels within the District then reviewed them for consistency in terms of receiving benefit from the Operational Plan. The Consultant identified the following parcel groups that were eliminated from receiving benefit for the reasons listed after each description. The following parcel groups were analyzed and included or eliminated:

PROPERTY GROUP A: 710 improved and unimproved properties. Total area = 186.6 ac +/- . All would derive some benefit from an assessment except for the properties (those larger than the average (mean) by two standard deviations) which would derive proportionately more benefit.

PROPERTY GROUP B: 30 boat slips. Total area = .163 ac All would derive no benefit from the assessment due to their use and small size, they are excluded.

PROPERTY GROUP C: 13 submerged or unbuildable properties. Total area = 3.70 ac +/- . All would derive no benefit from the assessment. They are excluded.

PROPERTY GROUP D: 23 tax exempt properties. Total area = 24.33 ac +/- . (See below for details of two parcels that constitute 73% of this GROUP.) Most if not all would derive no benefit from an assessment and they are all tax exempt. Therefore they are excluded.

PROPERTY GROUP E: Private airstrip. Total area = 6.79 ac +/- . Unique in that it contributes more benefit than it derives. (airstrip runs from Gulf to Sound; provides fire break between properties north and south of it; provides landing area for emergency medical evacuation aircraft) It is excluded.

PARCELS referred to in Property Group D:

05-45-21-03-00000.00CE: 3.08084 ac Safety Harbor Club Common Element used for townhouse grounds, club office, housekeeping and maintenance, sewage treatment.

05-45-21-02-0000A.00CE: 14.72862 ac Safety Harbor Common Element used for gulf beach, roadways & walkways, clubhouse, well houses, lake, pool, tennis court, garden and perimeter buffer.

The area of these two parcels could be divided up and reallocated to 53 house lots and 33 townhouse properties but the lake, pool and tennis courts would have to be excluded and all the other tax exempt common elements elsewhere on the Island would then have to be similarly analyzed and treated for fairness. The net result of all this would be marginal at best and doesn't warrant the additional effort.

Reference: www.leepa.org

After removing the above-mentioned properties from the assessment analysis, the Consultant took each of the parcel sizes as determined by the Lee County Property Appraiser data and listed them in order of their size from smallest to largest. From there, the Consultant first determined the number of parcels that had structures on them. Of the 710 parcels identified that are receiving benefit, 334 of them have structures on them. That amounts to 46.91% of the parcels having structures on them.

The Consultant then apportioned the total assessment to all parcels at 53.09% and to the parcels with structures at 46.91%. See Table 2 on the next page.

Table 2. Percent Calculation of Structures Versus Blank Parcels

Number of Parcels:	712
Number of Structures:	334
Percent with Structures:	46.91%
Amount for Assessment:	\$447,400
Apportionment to Parcels:	\$237,524
Apportionment to Buildings:	\$209,876

Using the \$237,524 amount for parcels, the Consultant then summed up the total square feet of the parcels and calculated the percentage of each parcel's square feet in relation to that total. The total apportioned amount for the parcels was then apportioned by each parcel's percentage to determine each parcel's land assessment.

The Consultant next took the \$209,876 amount for parcels that had structures on them and summed up the total square feet of structures and calculated the percentage of each structure's square feet in relation to that total. The total apportioned amount for the parcels with structures was then apportioned by each structure's percentage to the total to determine each parcel with structure's assessment.

The consultant then added the two sub assessments to determine the final apportioned assessment for each parcel receiving benefit within the District.

The final assessment calculation for each parcel will be determined once the final Project cost is determined.

The mathematical assessment determination for a \$447,400 Project is shown as an example in the attached assessment roll.

5.0 Assessment Roll

As described above, the debt associated with the District's Operational Plan will be assessed in the manner described herein, which may not be on an equal basis but if fairly and reasonably apportioned according to the benefit received for each parcel.

Once the Operational Plan cost is determined with financing costs added, a final assessment roll will be developed and presented to the BOC for approval in order to process the roll each year. The following Appendix shows each of the 710 parcel identification numbers, the owner, the size of the parcel, the size of the structure on the parcel if there is one on that parcel to determine the total hypothetical assessment to be levied against each parcel assuming the Operational Plan's cost is \$447,400. The total amount for the Operational Plan may change year to year as may the number, type, size of a parcel and/or whether a parcel adds or loses a structure. Therefore the assessment apportionment will have to be recalculated each year using the same assessment methodology.

APPENDIX A
