

Proposed Administrative Actions

- Face-to-face meetings, one-on-one with the owners that have the most egregious plantings/fencing in the easement that block/hinder access (Chief Kinniry & Commissioner LaVallie have been successful in the past)
- If that fails, a written request from the UCFRD Fire Chief & Chairman to the owner
- If that fails, a written complaint from the UCFRD Fire Chief & Chairman to Code Enforcement (<http://www.leegov.com/dcd/CodeEnf>, email to CodeEnforcement@leegov.com)
- If Code Enforcement fails to enforce the published AND RECORDED easements, then UCFRD Fire Chief & Chairman makes the written complaint to their boss, the Director of Community Development (<http://www.leegov.com/dcd>), David M. Loveland at DLoveland@leegov.com and 239-533-8509
- If the Director of Community Development fails to enforce, then UCFRD Fire Chief & Chairman makes the written complaint to his boss, Assistant County Manager Douglas Meurer at DMeurer@leegov.com and 239-533-2221
- If Assistant County Manager Douglas Meurer fails to resolve this, then UCFRD Fire Chief & Chairman makes a written complaint to his boss, County Manager Roger Desjarlais at RDesjarlais@leegov.com and 239-533-2221
- And if the County Manager Roger Desjarlais fails to resolve this, then UCFRD Fire Chief & Chairman makes a written complaint to our designated Commissioner District 1, John Manning at Dist1@leegov.com (his Executive Assistant is Rohland, Stacey at SRohland@leegov.com) and 239-533-2224

At some point, the County has to enforce our existing easements ... and they are not currently doing that!

Note that the data from <http://www.leegov.com/AboutUs/orgchart> and <http://www.leegov.com/Documents/High%20Level%20Org%20Chart.pdf> were used to find the supervisory chain for everyone.

Following this administrative complaint process costs nothing but time and perseverance.

If this process fails, we will have to consider writing Code and going through the ordinance approval process with Lee County for our "15'x15' fire safety pathway" on the existing 30+ recorded easements.
